

## Use case

# easyJet

### Company description

EasyJet is a leading European low-cost airline that makes travelling easy and affordable for its customers.

### Pain points

- Working in a company where not everyone works standard office hours can be a challenge when a signature for an important document is required.
- Working across multiple locations meant that I was not always in the right place with the right people when documents needed to be signed.
- Working in a small HR team which manages a lot of employees, we need to be efficient. Printing out paper documents for signature was time consuming, environmentally unfriendly, costly and time consuming.
- We are a digitally innovative company and carry out our recruitment on-boarding process digitally. Signed paper copies of contracts and documents do not fit in to our processes.

### Solution by Skribble

- No geographical boundaries for document signatures.
- No matter how people work or the time zone they are in, documents can be signed in a click.
- The system is easy and secure for both administrators and signees.
- The signatures can be used for all official documents including work contracts.
- Using Skribble has allowed us to reduce our paper consumption, making us more environmentally friendly.

### Statement by Sarah Jackson, Country HR & Administration Manager

"In the fast moving HR environment, it is important to be as efficient as possible. Constantly on the move between various locations, working with people who do not always work normal office hours, Skribble has allowed me and my team to request, sign and receive signatures for important documents no matter where the signee is located."
